Scott Farm Seed Company

Mechanicsburg, Ohio

For 80 years

So many times I feel the urge to get a little closer to our regular customers and those we hope soon will be using some of Scotts seeds. You must think each mailing from us is full of statements about seeds, prices, different crops, etc., and that we don't include very much that is personal about our business as it relates to you.

Mechanicsburg is a small country town sixteen miles from Marysville and about thirty from Columbus. With a few additions our buildings are the same as the former Wing Seed Company. Some of you may have bought from them or have known "Alfalfa" Joe Wing or others of the Wing family. We've been over here for three years; our only interest is handling and keeping up-to-date on farm seeds. Now the lawn business and ourselves don't crowd each other anymore.

The Scott Farm Seed Company has a rich tradition back of it. Weeds probably caused its start. Clear back in 1870 O. M. Scott had a country elevator and among other things sold farm seeds. Even then he was disturbed at the high weed content of seeds and the way weeds were spreading and causing unsightly fields and crop losses.

We've never had the ambition to sell huge quantities of seed but prefer to operate in a rather limited area and to help our customers with individual crop problems. Yet in 80 years a lot of seed has passed through Scott hands to a select group of farmers who want and appreciate choice quality seed. We believe the Scott efforts have meant better seed being sown and cleaner crops being harvested.

The best seed, of course, is cheapest in the long run. Land preparation, time and labor are the same in using either good or inferior seed but the results are so different. Everyone doesn't stop to reason it out that way and one of the big things that disturbed me as a County Agent was the willingness of so many to buy just seed, asking what is the price and not what kind of a crop will I get.

If you haven't sent us your Spring order I sincerely hope you are planning to do it soon. The finest seed obtainable is on hand at prices that year after year you will find very fair and reasonable. Won't you get your order in the mail today?

For cleaner fields and bigger yields,

The Scott Farm Seed Company

L. G. Brubaker

I can always depend on Scotts
for a top yield of extra
quality corn.

They all say *Scotts*
TM REG
is a **BETTER HYBRID**
... you will too!

I like the way Scotts stands up
and dries out for early cribbing.

Scotts produces good sound
disease-free ears.

For Dependable Yields Plant These Medium Hybrids

105 DAYS MATURITY

Scotts
66

A FAST STARTING,

vigorous hybrid that will usually crib in plenty of time for wheat seeding. Scotts 66 produces high yields under a wide variety of conditions. Stalks are strong and stand well for picking—good blight resistance. Ears are handy size, solid and fast drying.

Scotts 66 can't be beat!

110 DAYS MATURITY

Scotts
72

A HIGH PRODUCER with more resistance to stalk rot and blight than most hybrids in its class. Used as the main corn crop on many farms, SCOTTS 72 can usually be followed with wheat. Stalks are medium tall with showy clean picking ears that carry deep, dark yellow kernels. An excellent crib corn.

Give Scotts 72 a try—you'll like it.
